997 Villa Street  
Mountain View, California

Attn: W. M. Miller, Chief Fire Inspector

Dear Inspector Miller:

Attached are three (3) copies of the report on Chemicals, Gases, Flammable Liquids and Radioactive materials as used in our Mountain View Plants. This report should answer most of the questions put forth in your letter of March 14, 1962.

Regarding the disposal of various chemicals and reagents, our processes are such that these are usually washed down the drain with plenty of D. I. water. The T. C. E. is separated from the drainage system for reclamation at the rate of 500 gallons per week.

All flammables and/or toxic chemicals are used in exhaust hoods, thus preventing evaporation into the Plant atmosphere.

If any additional information is required, please contact the writer.

Thank you for your cooperation and assistance.

Very truly yours,

*Karl H. Kent*
